Foreword	vii
Chapter 1 Air Transportation and Airports.....	1
1.1 Airports in Japan.....	1
1.2 Aircraft.....	5
1.3 Airport pavements.....	6
1.3.1 Airport pavement facilities.....	6
1.3.2 Asphalt pavements vs. concrete pavements.....	9
Chapter 2 Performance and Management of Airport Pavements.....	13
2.1 Required performance of airport pavements.....	13
2.1.1 Required performance of pavements according to the JSCE.....	13
2.1.2 Required performance of airport pavements.....	14
2.2 Running safety.....	15
2.2.1 Planar shape.....	15
2.2.2 Evenness.....	18
2.2.3 Skid resistance.....	21
2.3 Load bearing performance.....	23
2.3.1 Load bearing capacity of pavements.....	24
2.3.2 Ground and subgrade.....	26
2.4 Management of airport pavements.....	26
2.4.1 Airport pavement management systems.....	26
2.4.2 Airport Pavement Optimal Rehabilitation Timing System.....	30
Chapter 3 Natural and External Force Conditions in the Structural Design of Airport Pavements.....	35
3.1 Ground conditions.....	35
3.2 Aircraft load.....	37
3.2.1 Size of aircraft load.....	37
3.2.2 Traffic volume.....	43
3.3 Environment.....	50
3.4 Subgrade.....	52
3.4.1 Composition of subgrade.....	52
3.4.2 Subgrade soil.....	52
3.4.3 Subgrade stabilization.....	53
3.4.4 Load bearing capacity of subgrade.....	53
Chapter 4 Structural Design of Airport Pavements.....	59
4.1 Performance based design method for airport pavements.....	59
4.1.1 Basics of design.....	59
4.1.2 Verifying the performance of asphalt pavements.....	61
4.1.3 Verifying the performance of concrete pavements.....	64
4.2 Specification based design method of asphalt pavements.....	67
4.2.1 CE method.....	67
4.2.2 Japanese method.....	70

4.3	Specification based design method of concrete pavements.....	80
4.3.1	The PCA design method.....	81
4.3.2	Jointed concrete pavements.....	81
4.3.3	Continuously reinforced concrete pavements.....	94
4.3.4	Prestressed concrete pavements.....	100
Chapter 5	Construction of Airport Pavements.....	107
5.1	Construction plans for airport pavement works.....	107
5.1.1	Content of construction plans.....	107
5.1.2	Drafting construction plans.....	108
5.1.3	Selecting materials.....	112
5.1.4	Selecting construction machinery for asphalt pavements.....	112
5.1.5	Selecting construction machinery for concrete pavements.....	114
5.1.6	Environmental measures.....	116
5.1.7	Works process schedule.....	117
5.2	Subgrade construction.....	119
5.2.1	Methods of subgrade construction.....	119
5.2.2	Materials.....	119
5.2.3	Construction.....	120
5.2.4	Construction management.....	123
5.2.5	Inspections.....	125
5.3	Base construction.....	127
5.3.1	Methods of base construction.....	127
5.3.2	Materials.....	127
5.3.3	Construction.....	131
5.3.4	Construction management.....	133
5.3.5	Inspection.....	135
5.4	Surface and binder course construction.....	139
5.4.1	Materials.....	139
5.4.2	Construction.....	143
5.4.3	Construction management.....	145
5.4.4	Inspection.....	146
5.5	Concrete slab construction.....	147
5.5.1	Materials.....	147
5.5.2	Construction.....	150
5.5.3	Construction management.....	152
5.5.4	Inspection.....	153
5.6	Pavement works for airports already in service.....	155
5.6.1	Characteristics of pavement works for airports already in service.....	155
5.6.2	Construction works inside restricted areas.....	156
Chapter 6	Airport Pavements on Soft Ground.....	159
6.1	Preparation of airport land.....	159
6.1.1	Airports in mountainous areas.....	159
6.1.2	Offshore airports.....	162
6.1.3	Ground liquefaction countermeasures.....	165
6.1.4	Situation of pavements on soft ground.....	166
6.2	Asphalt pavements on soft ground.....	166

6.2.1	Asphalt pavements with a high groundwater level	167
6.2.2	Sandwich pavements	170
6.3	Concrete pavements on soft ground	171
6.3.1	Structural design of concrete pavements taking account of differential settlement	171
6.3.2	The lift-up method to combat settlement in prestressed concrete pavements	176
Chapter 7	Inspection and Evaluation of Airport Pavements	181
7.1	Airport pavement distress	181
7.2	Airport pavement inspections	182
7.2.1	Patrol inspections	183
7.2.2	Emergent inspections	184
7.2.3	Periodic inspections	185
7.2.4	Detailed inspections	186
7.3	Evaluation of airport pavement surface condition	188
7.3.1	Methods of determining pavement rehabilitation necessity	188
7.3.2	Method of quantifying distresses	190
7.3.3	On-site surface conditions of airport pavements	192
7.4	Evaluation on the safety of aircraft maneuvering	196
7.4.1	Evaluation items for the safety of aircraft maneuvering	197
7.4.2	Skid resistance	198
7.4.3	Longitudinal roughness	204
7.5	Nondestructive evaluation of airport pavement structures	213
7.5.1	Introduction of FWD	213
7.5.2	Evaluation of asphalt pavements	214
7.5.3	Evaluation of concrete pavements	221
Chapter 8	Rehabilitation of Airport Pavements	227
8.1	Maintenance of airport pavements	227
8.1.1	Asphalt pavements	227
8.1.2	Concrete pavements	228
8.2	Repair of airport asphalt pavements	230
8.2.1	Selection of repair methods	230
8.2.2	Overlay of asphalt pavements	231
8.2.3	Reconstruction of asphalt pavements	236
8.3	Repair of airport concrete pavements	237
8.3.1	Selection of repair methods	237
8.3.2	Overlay of concrete pavements	237
8.3.3	Reconstruction of concrete pavements	242
